

EST Syllabus & Guidelines for UCS654 Predictive Analytics Using Statistics
2026 (2526 Even Semester)

Date & Time of Exam: 20 May 2026 | 2:00 - 5:00 pm

Duration: 3 hrs.

Marks: 30

Number of Questions: 6

1. Topic-1 (Dr. Suresh): Expanded derivation of the MSE loss
2. Topic-2 (Dr. Suresh): Training of the NN to achieve a given distribution in the prediction.
3. Topic-3 (Dr. PSR) : Least Sum of Square (LSS)
4. Topic-4 (Dr. PSR) : Model Ensembling and Calculation of evaluation parameters for classification and regression.
5. Topic-5 (Dr. Anjula) : Parameter Estimation
6. Topic-6 (Dr. Anjula) : Association Mining using ECLAT algorithm

Special Note:

- Total Questions: 6
- All questions will be of numerical/mathematical derivation/analytical type.
- **No step marking**
- Bring your own calculator.
- Paper will be easy and slightly lengthy, so manage your time accordingly.
- **One mark for attempting the questions in the order and mentioning the page number on the first page of the answer sheet.**
- The study material is available at the portal.
- No question out of the class discussion.
- Meet the individual faculty for topic-related query.
